SYLLABUS FOR Ph.D ENTRANCE EXAMINATION Artificial Intelligence PART – A

RESEARCH METHODOLOGY

Research and Types of research: Meaning of Research- Objectives of Research- Motivation in Research. Research methods *vs* Methodology. Types of research – Descriptive *vs*. Analytical, Applied *vs*. Fundamental, Quantitative *vs*. Qualitative, Conceptual *vs*. Empirical. Research Process. Criteria of good Research.

Research Formulation – Defining and formulating the research problem - Selecting the problem - Necessity of defining the problem - Importance of literature review in defining a problem – Literature review – Primary and secondary sources – reviews, treatise, monographs-patents – web as a source – searching the web - Critical literature review – Identifying gap areas from literature review - Development of working hypothesis.

Data Collection and analysis: Execution of the research - Observation and Collection of data -Methods of data collection – Modeling, Mathematical Models for research, Sampling Methods-Data processing and Analysis strategies. Data Analysis with Statistical Packages – Hypothesistesting, Generalization-and-Interpretation.

Interpretation and report writing - Techniques of interpretation - Structure and components of

scientific reports - Different steps in the preparation - Layout, structure and language of the

report - Illustrations and tables - Types of report - Technical reports and thesis

7. Fink, A., 2009. Conducting Research Literature Reviews: From the Internet to Paper. Sage Publications

Part B

Section 1: Computer Organization and Architecture

Digital Logic: Boolean algebra. Combinational and sequential circuits, Minimization; Number representations and computer arithmetic (fixed and floating point)

Computer Organization: Machine instructions and addressing modes. ALU, data-path and control unit; Instruction pipelining; Memory hierarchy: cache, main memory and secondary storage; I/O interface (interrupt and DMA mode).

Section 2: Programming Languages

Programming in C: Elementary Data Types; Tokens, Identifiers, Data Types, Sequence Control, Subprogram Control, Arrays, Structures, Union, String, Pointers, Functions, File Handling, Command Line Arguments, Preprocessors

Programming in C++ : Class, Object, Instantiation, Inheritance, Encapsulation, Abstract Class, Polymorphism, Tokens, Identifiers, Variables and Constants; Data types, Operators, Control statements, Functions Parameter Passing, Virtual Functions;

Programming in Java: The Java Virtual Machine, Data types, Conditional and looping Statements, Arrays, Methods and functions, Constructors, Overloading methods, Garbage collection, Packages

Section 3: Data Structures and Algorithms

Data Structures: Arrays, Stacks, Queues, Linked Lists, Trees, Forests, Binary Tree, Threaded Binary Tree, Binary Search Tree, AVL Tree, B Tree, B+ Tree, B* Tree, Graphs, Sorting, Searching.

Algorithms: Performance Analysis of Algorithms – Time and Space complexities, Divide and Conquer, Dynamic Programming, Greedy Algorithms, Backtracking, Branch and Bound, Breadth-First Search, Depth-First Search, Shortest Path, Minimum Spanning Tree, P and NP Class Problems.

Section 4: Database Management Systems

Database System Concepts: Data Models, Schemas, Architecture, ER Model, Relational

Model, Relational Algebra, Relational Calculus. Functional Dependency, Multi valued Dependency, Join Dependency, and Normalization Forms. SQL: Types of commands, Constraints, Views, Stored Procedures, Functions, Triggers. Deadlock – Prevention and Avoidance, Heap File Organization, ISAM, Hashing and Indexing

Section 5: Theory of Computation and Compiler Design

Theory of Computation: Regular expressions and finite automata, Context-free grammars and push-down automata, Regular and context-free languages, Turing machines.

Compiler Design: Lexical analysis, parsing, syntax-directed translation.

Section 6: System Software and Operating System

System Software: Machine, Assembly and High-Level Languages; Compilers and Interpreters; Loading, Linking and Relocation; Macros, Debuggers

Operating System: Processes, threads, inter-process communication, concurrency and synchronization; Multicore Programming, Multithreading Models Deadlock; CPU scheduling; Memory management and virtual memory; File systems

Section 7: Software Engineering

Software Engineering: The Waterfall Model, Incremental Process Models Evolutionary Process Models, Concurrent Models. Agility and the Cost of Change, Agile Process, Extreme Programming (XP), Adaptive Software Development (ASD), Scrum; Requirements Modelling: Requirements Analysis, Scenario-Based Modelling, UML Models, Design Concepts: The Design Process, Design Concepts, the Design Model, Architectural design, and component-level design. Quality management

Section 8: Data Communication and Computer Networks

Data Communication: simplex, half-duplex and full-duplex mode of data transmission, packet switching and circuit switching, Analog and Digital Signals; Noiseless and Noisy Channels; Digital and Analog Transmission; Data Encoding and Modulation Techniques; switching; Flow and error control techniques

Computer Networks: Network Hardware, LAN, MAN, WAN, OSI Reference Model, -Protocol IPv4/IPv6, routers and routing algorithms (distance vector, link state); TCP/UDP and sockets, congestion control. Application layer protocols (DNS, SMTP, POP, FTP, HTTP). Network Security: authentication, basics of public key and private key cryptography

Section 9: Computer Graphics

Computer Graphics: Video-Display Devices, Raster-Scan and Random-Scan Systems; Graphics Monitors, Input Devices, Points and Lines; Line Drawing Algorithms, Translation, Scaling, Rotation, Reflection and Shear Transformations; Matrix Representations and Homogeneous Coordinates, Polygon Surfaces, Quadric Surfaces, Spline Representation, Bezier and B-Spline Curves; Bezier and B-Spline Surfaces.

Section 10: Advanced Technologies

Artificial Intelligence & Machine Learning:

Artificial Intelligence: Intelligent Agent, State Space Representation, Heuristic Search Techniques, Adversarial Search Techniques, Knowledge Representation, Uncertain Knowledge Representation, Planning, Linear and Non-Linear, Goal Stack, Hierarchical, STRIPS.

Machine Learning: Machine Learning, Types of Learning, Supervised, Unsupervised, Semi-Supervised, Reinforcement Learning Techniques, Models, Tree, Rule, Linear, Distance-Based, Probabilistic.

IoT: Introduction, Characteristics, Elements, Transducers and types, Applications
